Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status

Claims 13,14 and 16 remain pending.

Claims 1-12 and 15 have been canceled.

Allowability Withdrawn

The previously indicated allowability of claims 13,14 and 16 is withdrawn upon further consideration.

Response to Arguments

The Applicant's arguments filed on February 23, 2004 have been fully considered but are not persuasive in view of newly discovered references Nummelin et al. (US Patent 6,038,164) and Srinivasan (US Patent 5,548,506)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nummelin et al (US Patent 6,308,164) in view of Abbruzzese et al., (US Patent No 5,557,515).

As per claim 13,

Nummelin et al ('164) discloses A method of electronically authorizing or repudiating an electronically processed task, comprising:

storing a plurality of elements with respect to the electronically processed task in a database subsequent to an electronic authorization or repudiation;(Column 7, lines 24-37)

referencing said plurality of elements of the electronically processed task for each electronically processed task and for each user requesting authorization (Figure 2)

Nummelin et al ('164) does not explicitly disclose "displaying said plurality elements of the electronically processed task for each electronically processed task and for each user requesting authorization" Abbruzzese et al ('515) discloses "displaying said plurality elements of the electronically processed task for each electronically processed task and for each user requesting authorization". (Figure 9A) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Nummelin et al ('164) method with the Abbruzzese et al ('515) method in order to provide a user interface to the database.

Art Unit: 3621

As per claim 14,

Nummelin et al ('164) discloses the method as claimed in claim 13

Nummelin et al ('164) does not explicitly disclose "repudiation reasons are stored in the database when a repudiation is rendered" Abbruzzese et al ('515) discloses "repudiation reasons are stored in the database when a repudiation is rendered". (Figure 9A) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Nummelin et al ('164) method with the Abbruzzese et al ('515) method in order to analyze the efficiency of task execution.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Srinivasan (US Patent 5,548,506) in view of Nummelin et al (US Patent 6,308,164).

As per claim 13,

Srinivasan ('506) discloses a method of reviewing tasks, comprising;

comparing a current task for the person in charge of the tasks to he stored completed tasks for the person in charge of tasks. (Figure 9)

providing a reviewer for the current task the review information for similar completed tasks.(Figure 7)

Srinivasan ('506) does not explicitly disclose "storing review information with respect to reviews of completed tasks associated with a particular person in charge of tasks" Nummelin et al ('164) discloses "storing review information with respect to reviews of completed tasks associated with a particular person in charge of tasks". (Column 7, lines 24-37) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Srinivasan ('506) method with the Nummelin et al ('164) method in order to analyze the efficiency of task execution.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M Winter whose telephone number is (703) 305-3971. The examiner can normally be reached on M-F 8:30-6, 1st Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James P Trammell can be reached on (703)305-9768.
